Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-57	YES
	Claims NONE	NO
Inventive Step (IS)	Claims 1-57	YES
	Claims NONE	NO
Industrial Applicability (IA)	Claims 1-57	YES
	Claims NONE	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-57 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the combination of generating estimated channel impulse response of combination of $co_m(t) = co(t + mNT_c)$ and received data sequence as a correlator output, and filtering estimated channel impulse response wherein the filter is based on the spreading sequence, as claimed in claims 1,20 and 39.

Claims 1-57 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 1-57 are objected to under PCT Rule 66.2(a)(v) as lacking clarity under PCT Article 6 because claims are indefinite for the following reason(s):

In claim 1, line 11, "the first estimated" should be "the estimated", line 12, "generate the estimated" should be "generate the", and the variables k , d_m , Λ , N and M should be defined in the claim.

In claim 3, line 2, "channel" should be "channel impulse response".

In claim 8, line 4, "less than" should be "and less than".

In claims 16-19, its dependency should be claim 9 to clarify its antecedent basis.

In claim 20, "the first estimated" should be "the estimated", line 12, "generate the estimated" should be "generate the", and the variables k , d_m , Λ , N and M should be defined in the claim, and in line 13, "h(t) with" should be "h(t)".

In claim 22, line 3, "channel" should be "channel impulse response".

In claims 35-38, its dependency should be claim 28 to clarify its antecedent basis.

In claim 39, "the first estimated" should be "the estimated", line 12, "generate the estimated" should be "generate the", and the variables k , d_m , Λ , N and M should be defined in the claim.

In claim 41, line 2, "channel" should be "channel impulse response".

In claim 47, line 4, "less than" should be "and less than".

In claims 54-57, its dependency should be claim 47 to clarify its antecedent basis.

Claims 2,4-7, 9-15,21,23-34,40,42-46,48-53 directly or indirectly depend on claim 1, 20 or 39.
